

ZEBRA MC3300 MOBILE COMPUTER

RAISE YOUR EXPECTATIONS.
WE'LL MEET YOU THERE.

You're tough on your technology—from the rigors of your rugged workplace to the demand for ease, reliability, and all the functions to increase worker productivity. Hardworking people demand a hardworking mobile computer and nothing does the job like the new MC3300. From front-of-store to the warehouse, it has the features – such as increased picking rates, easier aim and more – that finish the job.

CSSI has the power tool to exceed all your expectations. The Zebra MC3300 mobile computer presents world-class features, functionality, and performance.

VERSATILITY.

The MC3300 features four scanning form factors—gun-style, turret with rotating head, and straight shooter at 0° and 45°—plus the choice of three keypads. Mix and match to create the utility tool that matches your needs.

RUGGEDNESS.

Zebra's legendary toughness enables drops from up to 5 feet, and over 1,000 tumbles at 3.2 feet. IP54 sealing protects against dust, Gorilla Glass touchscreen resists scratches, and the MC3300 keeps working in temperatures from -4°F to 122°F.

SPEED.

1.8Ghz processor delivers lightning speed that boosts productivity, with up to 3 times the power of competitor's standards.

VISIBILITY.

The 4-inch display presents a bigger view, and pre-loaded All-touch Terminal Emulation lets you turn green screens into more intuitive, user-friendly touchscreens, with no back-end modification required.

SECURITY.

The MC3300 comes pre-loaded with Zebra's Mobility Extensions (Mx), which elevates Android to an enterprise-grade operating system, including tighter security and device management. Add Lifeguard™ for Android™ to extend the security and support even farther.

DATA CAPTURE.

Easily grab 1D and 2D codes with Zebra's superior scanning engine—short-, long-, or mid-range. Use SimulScan to capture text fields, phone numbers, images, signatures, check boxes, and entire documents—with just one press of the button.

BATTERY LIFE.

The PowerPrecision+ battery powers up in half the time. The warm swap function and metrics on battery health maximize the device's uptime.

CSSI has earned the certification of **Zebra Premier Partner**. We're committed to providing the right solutions to your challenges. Get a closer look at the Zebra MC3300 mobile computer with a CSSI expert.
